# About Priner

PRINER is the new name of MillsISI, a leading Brazilian provider of industrial services and maintenance, focused on Result Oriented Management, commitment to safety and innovation.

We have a dynamic, modern and flexible team, specialized in developing projects that promote maximum efficiency and flexibility, meticulous planning, HSE and quality.

We operate throughout Brazil, participating in major industrial projects and providing services in the Petrochemical, Pulp and Paper, Steel, Offshore, Naval and Mining sectors.

## Our History

PRINER was established in 1982 as a MILLS business unit to provide construction services and industrial facilities in Brazil. In 2013, it became an independent company under the name Mills|Si. In 2016, the name changed to Priner Serviços Industriais S.A.

## Industrial Services

Specialized in ACCESS, COATING, THERMAL INSULATION and PRESSURIZED HABITAT, Priner seeks innovative and integrated solutions, combining practicality and productivity with environmental conservation.

# ACCESS

SCAFFOLDING SYSTEM

WEB DECK™

UP SYSTEM

ROPE ACCESS

The execution of every project begins and ends with Access, an area of our expertise. Most industrial facilities have hard-to-reach areas, involving safety risks and requiring valuable time for the assembly and dismantling of access structures.

Priner is unrivalled in its ability to reach such places to perform maintenance or installation work.

Our engineering team understands all the issues involved, from the simplest to the most complex environments, and we are experts in the efficient coordination of our service portfolio.

## Scaffolding System

All the components of our scaffolding system are quick coupling, in line with standards NR-18 and NR-34: poles, ledger, diagonals, aluminum boards, extendable toe board and ladder. The solutions are developed in-house, generating high productivity.

## Web Deck™

A rapid installation suspended access platform with a high load capacity and protective netting for total enclosure of the workplace. Reduces installation time by up to 80%. The perfect solution for underdecks, bridges, piers and towers.

## Up System

A scissor mechanism, modular aluminum system, light, quick and practical for internal assemblies such as furnaces and silos. For use in heat generators, boilers, internal tanks and confined environments.

## Rope Access

We have a team of highly-trained industrial climbers for special projects in the coating, inspection and thermal insulation fields.

# COATING

Protective coating is vital for preservation of assets such as pipelines, equipment and metal structures. It has a direct impact on industrial facilities, reducing maintenance costs and environmental risks and expanding the life cycle of industrial plants.

# INSULATION AND PFP

PRINER has efficient solutions for conventional and removable thermal insulation systems, passive fire protection and acoustic insulation, promoting energy conservation, asset integrity and the reduction of operational risks. We have highly-qualified technical staff with extensive experience in the market.

# HABITAT

The pressurized habitat enables the execution of hot work such as welding, cutting and grinding in classified areas. Ideal for use in offshore oil platforms, refineries, industrial facilities and petrochemical terminals with Ex requirements.

# Project, Management and QHSE

We are proud to stand as a reference in QHSE training and practices in our market segment, and maintaining the highest standards is one of Priner's core values. Our staff includes highly-trained and qualified professionals, equipped to comply with all legal and site procedures in the various market segments.

## Workflow

Our Integrated Management seeks continuous improvement of the organization's internal processes, taking preventive action to minimize irregularities, accidents, incidents, occupational diseases and environmental impacts.

ISO 14001

ISO 9001

OHSAS 18001

# When you are looking for Industrial Services, you have every reasons to choose Priner:

## Commitment

An engaged Management Team, highly qualified to face any challenge.

## Safety

Our highly-trained personnel and rigorous compliance with processes have assured 35 years of leadership.

## Technology

We offer a full range of integrated services in industrial access systems, painting, insulation and pressurized habitat.

## Cost-benefit

Cost efficiency and commitment in providing the services.
